INDIBA® Deep Beauty

Power your beauty

INDIBA® Deep Beauty increases tissue temperature and cellular activity by promoting the synthesis of collagen and elastin and improving blood flow.

Tissue is stimulated and oxygenated from the inside, thanks to our Proionic® System.

INDIBA® Deep Beauty

How does it work?

The Proionic® System stimulates rejuvenation and revitalization, creating a tightening lifting effect whilst also reducing fat and cellulite as well as improving oxygenation and hydrating the skin.

With our technology, different biological processes are created at the cellular level through our specific frequency of 448kHz and two modes of application: Capacitive and Resistive.

Our specific 448 kHz frequency generates the following biological effects:

BIOSTIMULATION

Activation of cell proliferation, repair and restoration mechanisms

VASCULARIZATION

Increase in local blood supply and improvement of tissue oxygenation and nutrition

HYPERACTIVATION

Stimulation of metabolic processes and cell activity

TREATMENTS

Facial

INDIBA Deep Beauty helps our body regenerate collagen and elastin fibers, plumping the skin, lessening the appearance of wrinkles and improving the signs of aging
